INTERNATIONAL PRELIMINARY EXAMINING AUTHORITY

ROBERT M. SCHWARTZ RUDEN, MCCLOSKY, SMITH, SCHUSTER & RUSSELL, 200 EAST BROWARD BLVD. FORT LAUDERDALE, FL 33301

NOTIFICATION OF TRANSMITTAL OF INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Rule 71.1)

Date of Mailing

20 SEP 2004

(day/month/year) Applicant's or agent's file reference IMPORTANT NOTIFICATION 43146-0018 Priority date (day/month/year) International filing date (day/month/year) International application No. 03 June 2003 (03.06.2003) 03 June 2002 (03.06.2002) PCT/US03/17392 Applicant STEINER-ATLANTIC CORP

- The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
- 2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices)(Article 39(1))(see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

INTERNATIONAL PRELIMINARY EXAMINATION REPORT III. Non-establishment of opinion with regard to novelty, inventive step and industrial applicability 1. The question whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), or to be industrially applicable have not been and will not be examined in respect of: the entire international application, claims Nos. 8 and 13 because: the said international application, or the said claim Nos. ____ relate to the following subject matter which does not require international preliminary examination (specify): the description, claims or drawings (indicate particular elements below) or said claims Nos. 8 and 13 are so unclear that no meaningful opinion could be formed (specify): Claims 8 and 13 are improper multiple dependent claims in that multiple dependent claims cannot depend from any other multiple dependent claim. the claims, or said claims Nos. ____ are so inadequately supported by the description that no meaningful opinion could be formed. no international search report has been established for said claims Nos. 2. A meaningful international preliminary examination cannot be carried out due to the failure of the nucleotide and/or amino acid sequence listing to comply with the standard provided for in Annex C of the Administrative Instructions: the written form has not been furnished or does not comply with the standard. the computer readable form has not been furnished or does not comply with the standard.

International application No. PCT/US03/17392

NO

Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability: citations and explanations supporting such statement

Citations and explanations supporting st	uch statement	
1. STATEMENT		
Novelty (N)	Claims 1-4, 6, 7/6, 9-12, 14-18	YES
	Claims <u>5, 7/5</u>	NO
Inventive Step (IS)	Claims 1-4, 6, 7/6, 9-12, 14, 15	YES
	Claims 5, 7/5, 16-18	NO
Industrial Applicability (IA)	Claims 17, 9-12, 14-18	YES

2. CITATIONS AND EXPLANATIONS

Claims 5 and 7/5 lack novelty under PCT Article 33(2) as being anticipated by either HOEFLIN, HENDRICKSON et al., THURMAN, ANDERSON, OR RIHR. Note that HOEFLIN, HENDRICKSON, THURMAN, ANDERSON, and RIHR each disclose a process for cleaning a textile a drum by placing a absorbent material in the drum, generating relative movement between the drum and pad material, thereby causing a scrubbing action.

Claims NONE

Claims 16-18 lack novelty under PCT Article 33(2) as being anticipated by BOCHAN et al. Re claim 16, BOCHAN disclose the drum, the highly absorbent pad material (12) in the drum, means for introducing cleaning and rinsing liquid into the drum and means for generating relative movement between the textile and the pad material thereby causing a scrubbing action on the textile material. Re claim 17, BOCHAN discloses the pad material being placed in the drum. Re claim 18, BOCHAN discloses the combination washer/dryer (see col.1, line10-15).

Claims 1-5, 6, 7/6, 9-12, 14 and 15 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest a process for cleaning a textile where the textile is only dampened with liquid, other that spotting, not immersed or soaked with the step of controlling the hydration of the textile by the use of a absorbent pad material.

Claims 1-7, 9-12 and 14-18 meet the criteria set out in PCT Article 33(4), and thus claims 1-7, 9-12 and 14-18 have industrial applicability because the subject matter claimed can be made or used in industry.
